PRICING

The chart below is a guideline for our pricing. A price will be quoted when our technician inspects the damage.

FOR ONE DENT

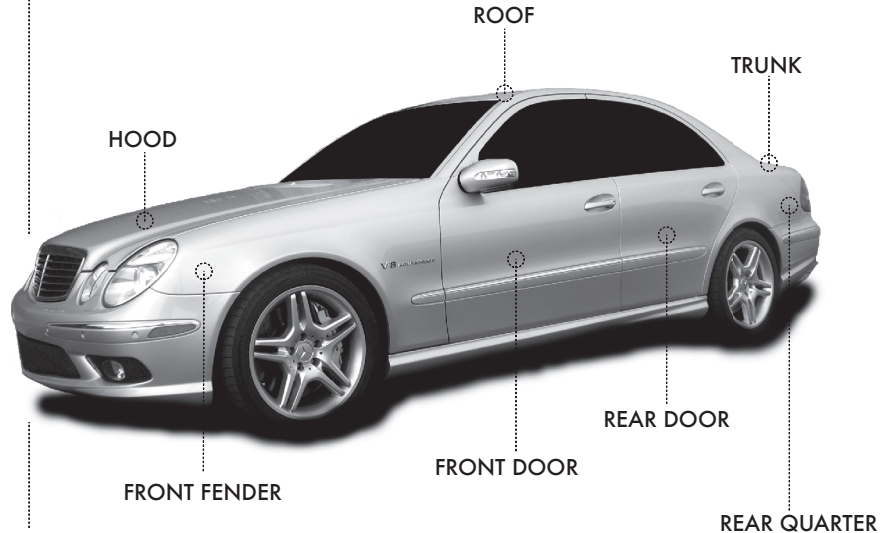

Using a measuring tape or ruler, measure your largest dent across the widest points of the dent. Using the chart below, determine your repair price from the "black" row (Largest dent on panel) of numbers.

FOR MULTIPLE DENTS ON SAME PANEL

Measure largest dent first as described above. Measure smaller dents and use numbers on "red" row (Additional dents on same panel) and add that to the price you came up with from above.

These guidelines are for dents of average depth and normal accessibility. Extreme damage and horizontal creases will need to be bid by technician upon review. For aluminum panels and dents on bodylines, add 25% to panel price.

PANEL IDENTIFICATION

LARGEST DENT ON PANEL
 ADDITIONAL DENTS ON SAME PANEL

LARGEST DENT ON PANEL	\$99	\$129	\$159	\$189	\$219	\$249	\$279	\$300+
ADDITIONAL DENTS ON SAME PANEL	\$20	\$40	\$60	\$80	\$100	\$120	\$140	\$160+
